#SoftwareReview MAUS Performance Review is an intuitive and easy to understand piece of software that was developed to assist companies in performing job assessments at regular intervals, enabling both employers and employees to learn what needs improving. Straightforward and user-friendly appearance The application features a clear-cut and approachable user interface, making use of tabs to organize its main sections,

specifically 'Employee Setup', 'Performance Appraisal', 'Annual Goal' or 'Employee Log'. From the program's ribbon or the context menu options, you can add new entries, filter results or edit existing records of previous reviews. Moreover, you can access and view a series of statistical information about the given appraisals, or schedule future tasks. Assess your employees and set goals and appraisals for each

one For starters, you are required to populate MAUS Performance Review with employees, placing them in a specific group and entering their personal details, everything from name, gender and age, to job title, email address, department and division, as well as 'Additional' details, for instance salary, pay frequency or tax status. To every employee in your records, you can associate an assessment 'Log', in

which you can include not only the discussion you had with the person, but also any comments that were made, even being able to attach one or more documents.

Moreover, MAUS

Performance Review allows you to set 'Goals' for your employees and monitor their level of achievement as compared to the target. The 'Appraisal' section enables you to b7e8fdf5c8

Apply human resources management and gain visibility and control of your workforce for what matters most to you. Innovative performance management software. Simple and intuitive to use. Manage the performance of your employees and set goals and performance appraisals. Automatically identify and name those that fall behind. MAUS Performance Review
